Editors Note

Have you ever wondered how something out of the ordinary occurred? How mysteries were made, but could never truly be solved? Something greater than what we know is out there, but only if we believe it to be. Supernatural shows that something is different, whether it is spirits or magic or anything that we don't believe to be normal. Supernatural isn't just another word to describe impossible,
It is impossible.

The extraordinary feature of the term supernatural is that it varies from person to person. I for one do not believe in magic, but I do believe in miracles (which obviously can not be defined). In every person's life, something supernatural would have taken place. It could have been good, it could have been bad. It even could have been both, but the important matter to take in hand is the fact that it couldn't be solved, no matter what.

So this edition, we ask you to believe. Believe in the impossible and prove that there is something else out there. This edition, express your thoughts and what you believe in, because after all, that is all that matters.

The Haunted House Wreck

ARTICLE OF THE MONTH

It all started when Mike lived in the big wreck with his sons. Their names were Ben and Alfredo. Every night he saw a shadow on his room wall, so he got scared and moved out of the wreck.

After that, a person called James moved into the wreck. The ghost started showing its scary face to James. James had been writing, when he saw the shadow. The shadow had become alive and scared James. James fainted and was brought to the hospital.

James found a book when he came back from the hospital. He opened the book and suddenly went inside of it. He saw a house, he went inside, and something or someone killed him with a knife.

When James was killed, he had a clue, the ghost was a girl. Mike had been outside of the book. He also opened the book and went inside. The ghost saw him and did not attack.

Mike had then found out who the ghost was. Mike's wife was the ghost! He had an injection that turns ghosts into humans. With that, he turned his wife back into a human.

Paladins: Champions of the Realm

○ ————— ○ GAME REVIEW ○ ————— ○

Paladins is a free-to-play first-person shooting game for all age groups. Paladins was made by Hi-Rez Studios, the creators of SMITE and Tribes. It is a multiplatform game which consists of an array of champions that a player can pick while playing the game. All Paladin heroes are original and have been made from scratch, by a team of designers and artists.

Paladins was opened to its BETA phase on September 16, 2016 for PC and opened to its BETA phase for consoles, like Xbox One and PlayStation 4 on May 3, 2017. The game has multiple gamemodes like Siege, Payload, Onslaught and Test maps. The most popular gamemode that is used in competitions is Siege. In Paladins, there are multiple roles to play. Players choose their roles according to their playstyle. The roles are Frontline, Flank, Damage and Support.

Paladins is one of those games that is difficult at the beginning, but as you start to progress, it becomes relatively easy to win. This particular game relies on teamwork and strategy. All champions have contrasting cards to choose from. Another quite impressive feature is the fact that 'items' can be purchased during a game. These items help you, by making it easier for you to eliminate your adversary.

Paladins uses simple graphics, and this makes it possible for most computers to run the game, without the character teleporting here and there.

Paladins is currently one of the best games and is mostly played by teenagers, including those in our school. Paladins is still in its BETA phase, so all of us can expect the game to only become better as time progresses.

Google shocks the world with its new release : Pixel 2

Google has packed Pixel 2 with all the new features you need. The Pixel 2 comes with the new 8.0.0 Oreo OS and with the top of the line Qualcomm Snapdragon 835 processor for fast processing.

It is also waterproof, so don't worry if it falls into the swimming pool. The phone has the highest rated smart-phone camera and unlimited data storage for photos and videos in original quality, like its predecessor. It has a rear 12.2 MP and front 8 MP camera for high quality photos. The Pixel 2 also comes with "Google Lens", a handy app that gives you information about buildings, books, movies, albums and artwork just by looking at it. Wondering what song is playing at the store? The Pixel 2 immediately recognizes the song and displays it on the screen, alongside with the singer. Now, the

Google Assistant can be accessed much more easily by squeezing the phone. It comes in 2 sizes (Normal and XL) and in 3 colors (Just Black, Clearly White, and Kinda Blue).

Reversing Paralysis

Scientists have found a way to allow paralyzed people to move again, using electrodes in the brain and spinal cord. The French neuro-scientist, Gregoire Courtine, is the head of the project to find a cure for paralysis. He tested this by injuring a monkey and paralyzing his leg. Courtine then implanted the device in the monkey's brain, and with success, he could walk again! The scientists then took it one step further, by implanting the device into a quadriplegic (a person who cannot move his or her limbs).

The device consisted of 2 recording devices, made of silicon, which was smaller than a postage stamp. They also implanted 16 fine electrodes into the muscles and spine. The man was able to move again. Scientists are now making plans to print the electrodes onto rubbery strips that can extend and flex as our muscles do. The printing of the strips will be monitored and executed by a wide range of people, from scientists to Swiss watchmakers.

The device will be mass marketed in 10 to 15 years, and will become a very common tech between normal people.

MOVIE REVIEW

Have you ever felt odd? Like, you just don't fit amongst the 'perfect prototypes' of the society? That is exactly what this movie is about; to have the ability to embrace your weirdness, or rather your uniqueness.

This film, expertly directed by Tim Burton with his usual hypnotizing visuals and enchanting narration, follows Jake's spine-tingling quest to find the truth of a secret refuge. The movie explores complex themes of life, including the battle against the overwhelming yearning to belong and endless courage for friends. It takes you through alternate realities and also plunges the audience, right into the heart of it.

This imaginary world, is similar to a looking glass, through which the audience will most likely find a reflection of themselves and what they experience in their every day life.

The movie has portrayed, in its own appealing way, that being different doesn't make you a misfit - it makes you unique and beautiful in your own way.

Other remarkable movies by Tim Burton

- Alice in wonderland,
- Edward Scissorhands,
- Big Fish,
- Batman,
- Planet of the apes,
- Charlie and the chocolate factory
- Frankenweenie.

Fact:

This star-spangled movie is a book adaptation. The author Ransom Rigg's sole inspiration to write the book, was from a collection of real vintage photos taken, each one providing an idea creepier than the one before.

How Music Influences Scary Movies

MUSIC SECTION

When you hear the word 'music', you might think of you classical, pop or rock. What you don't realize is that the type of music you listen to can change your mood, or make you feel a certain way. If you like to run or exercise, you might listen to upbeat music to get yourself in an energetic mood. In the same way, when you're watching a horror/thriller movie the music will influence the vibes you get from the scene. Watching a scary movie with the sound turned all the way down, won't give you the same effect.

Examples:

1. IT
2. Insidious
3. Jaws
4. Scary Movie
5. Conjuring

Popular Songs Now:

1. Call it What You Want - Taylor Swift
2. Feel it Still- Portugal the Man
3. Wolves- Selina Gomez ft. MARSHMELLO
4. Let me go; Hailee Steinfeld, Alesso ft. Florida Georgia Line
5. Find You; Nick Jonas
11. So Much More Than This; Grace Vanderwaal
12. Bedroom Floor; Liam Payne
13. Harry Styles
14. Out Loud; Gabbie Hanna
15. Dive; Ed Sheeran

Top 3 Sports In the world

SPORTS SECTION

Sports are a very big part of many peoples lives. There are a lucky few who get to play sports professionally. Lots of kids are inspired by athletic people and games like the Olympics, Paralympics, etc., A countless number of people are galvanized by Gabby Douglas, an American Olympic gymnast. For example, my role model is the phenomenal Victoria Arlen.

She was diagnosed with two rare conditions known as transverse myelitis and acute disseminated encephalomyelitis at the age of 11. Due to her illness, Victoria was not able to walk, eat, speak, or move for nearly four years otherwise known as a vegetative state. In 2010, Arlen started to regain her abilities. Later on due to her determination and persistence, she broke records in the 2012 Paralympic trials in the category of swimming. And in 2016 she made a nearly full recovery and regained movement in her legs. Now, she is on the famous American television show called Dancing With The Stars.

Three of the most popular sports in the world are soccer, basketball, and tennis. Soccer is the number one most popular sport with over 4 billion fans. With its combination of adrenaline-pumping excitement, man-on-man aggression, and tough competition, it's really no wonder it comes on top.

There are many controversies about players and teams in soccer, for instance, the "rivalry" between Lionel Messi and Cristiano Ronaldo. Soccer was invented in England, in the mid-19th century.

Basketball is the second most popular sport on the globe with over 1 billion fans. Basketball draws a huge following with more than 200 nations competing against each other. Basketball was invented in Springfield, Massachusetts, USA in 1891.

Tennis is the third most popular sport on the earth with around 1 billion fans. Tennis was first played in the Olympics in 1896 and then removed in 1924. In 1988 it was re-added to the Olympics as a real event. Tennis has been part of the Paralympic Games since 1992. Most believe tennis originated in Northern France in the 12th century. Soccer, basketball, and tennis are the top 3 most popular sports watched, but there are many other sports which interest the people just as much.

Magnus Chase and the ship of the Dead

BOOK REVIEW

Loki, the trickster god, is free from his chains. Now he is readying Naglfar, the Ship of the Dead, armed with a host of giants and zombies, to sail against the Norse gods and begin the final battle of Ragnarok. It's up to Magnus Chase and his friends to stop Loki's plans, but to do so they will have to sail across the oceans of Midgard, Jotunheim and Niflheim in a desperate race to reach Naglfar before it's ready to sail on Midsummer's Day. In the process of stopping Loki, Magnus must find a magical mead that will either allow Magnus to defeat Loki, the silver tongued God, in a battle of words or destroy him entirely. In the battle though, if Magnus is defeated by Loki, he will be reduced to the shadows and will suffer in Helium, while Ragnarok will end all life in the 9 worlds.

The book was extremely exciting and vastly entertaining. Once again, Rick Riordan has managed to combine the modern era with one of the greatest mythologies yet, the Norse. Personally, I would say this is one of best works of art and has gone beyond the expectations of the readers. The most important thing which was enjoyable was the fact that so many new characters were featured in this book and the storyline changed so many times, keeping the suspense high.

Even at the end, the twists never stopped. The new characters introduced in this book really changed the course of this book. This wondrous book was hilarious, mysterious and action packed. I would recommend this book for young readers, especially those who can cope up with the gods.
