“ Stories can be read but when enacted they come alive ”

Stories fire up the imagination but when they are enacted through the medium of puppetry they open up a whole new world of possibilities. It's a wonderful art combining creativity with dexterity and the ability to tell a story employing puppets who take a life of their own by the sheer skill of the puppeteers!

The children went out of their way by enacting stories through puppetry and it certainly was a wonderful learning experience for them.

Academic Reflection

“Story telling is the most powerful way to put ideas into the world” – Robert McKee

A puppet show is a performance in which the principal actors are puppets. Some of the most enthusiastic fans of puppets have always been children. Children love to watch a good puppet show, but they love manipulating puppets even more. A child can indulge in her love of puppets by creating her own puppet show.

If children use their imaginations, they can create their own puppets, a puppet theatre, and even write a play for the puppets to perform.

The table serves as the stage while the puppeteers hide behind it. Children may consider making a puppet theater from an old cardboard box .

S.P.Kaasish Krithvik TIPS

At TIPS we teach the young learners to learn and unlearn their daily life through stories.

Parent Chronicles

“Parents are parents but grandparents are our best friends”

Children love the company of grandparents. Nobody can tell a story as good as Grandma. It's a very special occasion when she sits down to tell a story. Especially so when accompanied by song and dance by the children to add that extra element to the story.

Pocket Phonics

Phonics is fun! It's the exciting component of all languages. When the phonetics of a language is strong, that lays a great foundation of conceptual understanding. At Tips, English is exciting as it holds surprise components like fun activity along with the lessons.

As a reflection of their learning of variant vowel oo (oo,ew,ue) children got dressed in blue colour holding blue balloons. children identified variant vowel oo (ue,oo)when they saw blue balloons in the garden.

Health & Beyond

“Failures as well as defeats are stepping stones to success.”

Balance is very powerful word in our life. Balancing both forms of mental and physical skills for a children are very important . Priority given more for for mental health and not physical health can be challenging for children. They should be given chance to take part in any form of risks and challenges. To take part and facing failure and defeat for the same ,waiting for the opportunity and proving themselves will have a positive impact on children

Budding Influencer

“Action is the fundamental key to all success”.-Pablo Picasso

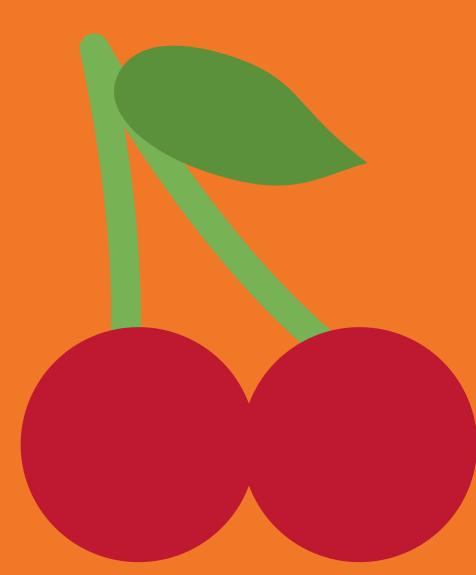

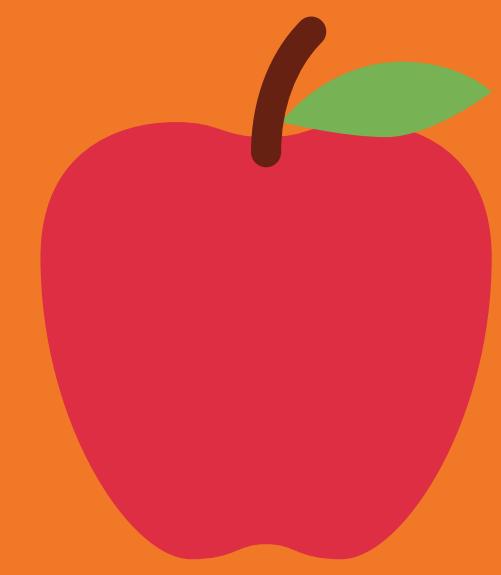

As said above, Education is a powerful tool which changes the world. It's a child natural curiosity, they learn more through play.

Students made their own weighing balance machine using sticks, paper cups, hangers etc.. They start to compare the weights using nonstandard units. They enjoyed learning and meanwhile they learned the concept of “Measurement”. Measurement is not only for things but it also for time. Time management is the fundamental key for success. Children learning time management in young age will lead to disciplined life style in future.

Potpourri

Health is the greatest wealth

Health does not always come from medicine. Most of the time it comes from peace of mind, laughter and love.

Life is not merely being alive but being well. The journey to health is not easy but is very rewarding. On world health this year (7.4.2022) let us take the pledge that we will give our biggest priority to our health in all circumstances. Our budding stars of KG 2 have done just that.
