Ready, Set Go!

Participating for the track fest after a hibernation of 2 years of Covid was a challenge. Testing my speed and stamina in the 100mts, hurdles and relay was exciting, The excitement was further added on with the weather playing spoil sport with a heavy downpour at the start time. It was a blessing as the hot unbearable heat was transformed into a cool evening fit for our track event. With equally qualified athletes, the race was pressurizing at the same time rewarding. Parent community enjoyed a lot seeing their wards in action, cheering and snapping our best shots for memory. Individually and group wise , I won 4 Gold medals and we, the DP team, were undoubtedly the winners. Patience, endurance, focus and team effort was the takeaway.

Well Fared! *[FUNDRAISER]*

During the Track fest, as part of my CAS activity, I had the opportunity of collecting funds for the Aatral foundation, which is a non-profit organization headed by our Managing Director, Mr. Ashok Kumar. The project is to renovate the Government schools with the basic infrastructure required for a child to study in a conducive environment. Managing the Promo booth along with my friend Akshay and juniors- Diya and Abhishek of IBDP-1, our challenge was to persuade the parent community to contribute for the cause. We tried to convince them by showcasing the focus of the project with flyers and on a one-to-one basis we explained about the active role that IBDP students play in the foundation. Also, futuristically how we further would like to expand our activities and aim to succeed in rejuvenating all the Government schools in Tamil Nadu. Generous parents and students gladly contributed to our crowdfunding process, supporting our philanthropic passion to help the needy. This charitable activity which catered to the welfare of the needy children was a fruitful experience.

The 'C' in CAS *[ARTS & CRAFTS]*

Pottery generally means the process of making vessels or other objects using clay or ceramic materials. Earliest forms of pottery were made from clay and this has gained particular importance in India, as clay vessels are now popularly being used for cooking purposes. Since we have been using clay pots for cooking at home, I was excited when our school organized a pottery class. I wanted to see the process and try my hands at making it too. And this is exactly what I did. Made a clay pot, painted it and now I have planted an indoor plant and using it as a decorative signature work of art. We were also exposed to Warli art. Voila! I am happy to have tested my creativity and hope to add on to my home collection.

The Next Step *[CAREER FAIR]*

There were a wide range of universities from all over the world for the career fair organized by our school. All of the IDP representatives were very informative and gave us vital information about their universities and the difference in the education system of those countries. They were well-versed with the programmes of other countries too and were aware of their countries' advantages and disadvantages. They listened to our requests and gave advice based on our aspirations. They did not try to force us to join their university but acted on our best interest hence, it was beneficial in narrowing our university choice. The purpose of career counseling was met.
